

BUILDING THE ULTIMATE ADVENTURE RIG

STARTS WITH QUALITY MATERIALS

FORGE A FOUNDATION OF STRENGTH

Our **Duratec™ Vinyl Ester Primer (#1799-006)** is the ultimate base coat, engineered to protect your adventure vehicle's interior and exterior with unrivaled resilience. Originally developed as a barrier coat for boat hulls, this primer has made its way into the Overlanding industry because of it’s superior performance in the face of moisture, elements, and changing temperatures.

Key Features:

- Thin film application reduces weight while maximizing benefits.
- Quick cure minimizes wait time and accelerates production.
- Versatile compatibility makes it useable with various substrates and topcoats, from epoxy to gelcoats.
- Acts as the ultimate barrier coat for finished FRP parts, resisting moisture and variable temps.
- High HDT for endurance under the sun, can be used under black vinyl wraps.

ELEVATE AESTHETICS & DURABILITY

SCAN ME

Duratec™ HV White Hi-Gloss Coating (#614-070) Key Features:

- Thin, durable coating with high gloss finish.
- Levels and flows easily across various surfaces.
- Non-porous surface that resists staining and is easy to clean.
- Compatible with epoxy, offers minimal sanding & hassle-free application.
- Color matching available for seamless integration with your design.

PROTECT WITH PRECISION

SCAN ME

Sunshield Clear Topcoat (#904-061) Key Features:

- UV and water resistance for long-lasting clarity and performance.
- Unparalleled protection & shine for carbon fiber parts and surfaces.
- Easy application and excellent clarity for maximum visibility.
- Available in a High Viscosity version for use in-mold.

CREATIVITY WITHOUT THE COST

SCAN ME

StyroShield Primer (#707-019) Key Features:

- Acts as a barrier coat for EPS Foam, providing a cheaper way to craft custom one-off plugs.
- Great option for making affordable custom modifications to a larger mold.
- Can be layered with other primers to strengthen the plug, enhancing longevity and reliability.

Our products have been tried & trusted by leading builders in the overlanding and truck camper industry for years. Hawkeye Industries' Duratec™ surfacing materials are most often utilized in single-piece fiberglass and carbon fiber molds and camper shells. With A to B and B to A capability, our solutions streamline equipment needs, reduce costs, and enhance efficiency.
